- New enemies: the Black guards, the Giant Spider, the Spider Rider and more.
 - Three new terrifying bosses.
 - A mysterious hidden Dungeon.
- New deadly traps. Be ready to avoid them.

I want to begin by saying that this DLC is very good in content. It adds a whole new dungeon, companion, and little things to the original levels of the game and more.

My negative score is because of bugs. There are several. Even though Crian did their best and worked around the clock to stabilize the game, it still has game breaking bugs, like the random crashes, which keep you from even finishing the DLC. All the time you are just praying, hoping that you can finish the content before it crashes, leaving you to redo the level aaaaaall over again. This results in a frustrating experience and sucks the fun from it.

It's a shame really, because the story and the new content is great. The moment the bugs are addressed, i will change my recommendation to this DLC. Here's hoping Crian can make this work.
